  - Proof of the Main Theorem

## There Is No Largest Prime Number

The proof uses reductio ad absurdum.

## Theorem

There is no largest prime number.

## Proof.

- Suppose *p* were the largest prime number.
- 2 Let *q* be the product of the first *p* numbers.
- $\boxed{3}$  Then q + 1 is not divisible by any of them
- 4 Thus q + 1 is also prime and greater than p.
